Google NESAs compliance for banks UAE

AI Mode All News Forums Images Videos Shopping More Tools

AI Overview

NESA (National Electronic Security Authority) compliance for UAE banks is a mandatory cybersecurity framework based on the UAE Information Assurance Standards (IAS). Managed under national regulatory bodies like the UAE Cyber Security Council, it requires financial institutions to secure critical infrastructure, manage digital risk, and protect sensitive customer data. AI OVERVIEW + GOOGLE 1ST PAGE

Google Red team assessment for banking apps India

AI Mode All Images News Forums Videos Shopping More Tools

AI Overview

A Red Team Assessment (RTA) for a banking application in India is a goal-based, stealthy cyberattack simulation. It tests a bank's entire defense ecosystem—including application APIs, cloud servers, employees, and the Security Operations Center (SOC)—against tactics used by real-world threat actors. These exercises help banks meet compliance guidelines set by the Reserve Bank of India (RBI) and the IDRBT (Institute for Development and Research in Banking Technology). Seqrite +5
